

T.Y. 2020-2021

Capacity in Advance

Offer of “Capacity in Advance” as described in Storage Code at Chapter 3.2.1.4 and Chapter 5.9.2.1.

With reference to “Capacity in Advance”, Edison Stoccaggio makes available:

PARAMETERS	AUCTION DA 18.11.2020	AUCTION DA 19.11.2020
Day when capacity will be available	19.11.2020	20.11.2020
Max Performance available in Advance	2,110,000 kWh/d	2,110,000 kWh/d
Days of Reduction	21.11.2020 & 22.11.2020	21.11.2020 & 22.11.2020
Conversion Factor	1	1
Percentage of Reduction	50% on 21/11 (1,055,000 kWh/d)	50% on 21/11 (1,055,000 kWh/d)
	50% on 22/11 (1,055,000 kWh/d)	50% on 22/11 (1,055,000 kWh/d)

Customers may participate to one or both auction without sequentially bonds, but they shall reduce the capacity in the day/s decided by Storage Company.

Quantity of “Capacity in Advance” which goes as offer in the dedicated Auction is formed by the offers of reduction. It means that, if none edit offers of reduction, the quantity in advance is null.

Both Quantity and Price edited for the reduction are normalized by Conversion.

“Function of Cost” is ZERO.

Price shown in the Auction is the sum between the normalized price of reduction and the function of cost.

Purchasing offers have to be inserted in Escomas’ page in “Offerte Asta Day-Ahead”.
