

Clarifications- Injection capacity over 100% gas stock level

26 May 2022

To facilitate the gas storage filling through Conferimenti Impliciti according to the par. 1.4 of MITE-Ministerial Decree 1 April 2022, temporarily and exceptionally with respect to normal operation, the injection capacity of Peak Modulation service (calculated at the beginning of the month M through the Ru parameter) and the injection capacity of Punte Costanti service will continue to be available to the Shipper even over 100% of gas stock level of the contractual space assigned.

Edison Stoccaggio will apply the above within the limits of the correct and safe operation of the storage facilities and the availability of space not yet assigned. Also, for these reasons, Edison Stoccaggio reserves the right to restore, at any time during the injection campaign, by giving adequate publicity on its site, the normal operation of the injection capacity in the event of reaching 100% of the contractual space.

Finally, considering that the Punte Costanti service has been fully assigned, Edison Stoccaggio clarifies that the Conferimenti Impliciti, according to the par. 1.4 of the MITE Ministerial Decree of 1 April 2022, will be allocated to the Peak Modulation service (in accordance with what has already been communicated on May 5, 2022 by Edison Stoccaggio).
